Fiber to Video Conversion Pricing and Options**

Please check all boxes that apply

I want to convert a Gastroscope

Basic Gastro Conversion

- I need a scope \$3499
- I have a scope \$2999

This conversion will take your fiberscope and turn it into a videoscope by removing all of the internal components of the insertion tube and replace them with a micro CCD and LED lights. We will use your existing insertion tube and angulation system. If your insertion tube is in poor condition or prefer the 150cm length then you may want to use the "Insertion Tube Upgrade" Option. You will still be able to use your light source for air and water.

Options

- Insertion Tube Upgrade Includes \$999
Removal of the old insertion tube
Install new 150cm insertion tube, 2.0mm biopsy channel, air/water channel, coil pipe assembly, bending section and angulation wires.

- Portability Upgrade Includes
Remove the light guide tube
Syringe adapters on the air/water and suction cylinders
(this option with disable the leak testing capability) \$499

Compatible Models

GIF-XQ10,GIF-XQ20,GIF-XQ30,GIF-PQ20,GIF-XP10,GIF-XP20,FG-29,FG-38

Other models may also be compatible for conversion. If you have a model that is not in this list please email repairs@1800endoscope.com
